

JAMES B. HAY MURDERED

BODY FOUND IN TRENCH AT SALT LAKE.

He Was Robbed of \$3,800 in Cash by Perpetrator of the Crime.

SALT LAKE, Utah, December 18.—The body of James B. Hay, secretary of the Pacific Lumber Company, was today found buried in a shallow trench alongside the Rio Grande tracks near 6th and 13th south streets. Monday night Hay called at the home of Peter Mortensen, a contractor living at 2219 Walnut avenue, and collected \$3,800, which Mortensen owed the Pacific Lumber Company, and which late in the afternoon Hay had refused to accept, not caring to leave that amount in the office safe at night. He gave a receipt to Mortensen for the money and left the latter's house with the remark that he was going to take the money to Manager G. E. Romney of the lumber company. Since that time nothing has been heard of Hay until today, when his body was found. The money was gone and in the back of Hay's head was a great jagged wound.

It is the theory of the police that some one saw Hay receive the money from Mortensen, followed him when he left the house and murdered him and buried the body in the hastily dug trench.

Hay was thirty-one years of age and was prominent in Mormon Church work. He came to Salt Lake from Australia several years ago.

GOVERNMENT PUBLICATIONS.

Annual Report of the Superintendent of Documents.

The superintendent of documents, Mr. L. C. Ferrell, has submitted his annual report to the public printer for the last fiscal year. It shows, as compared with the previous year, there was an increase of 3,500 documents, and of 1,500 in receipts. Mr. Ferrell suggests that as he has been unable to supply requisitions for popular publications, the public printer be authorized to print extra editions of documents whenever required for sale.

During the year the superintendent of documents received 750,000 copies of 750,000 documents. Of these 579,510 came from the government printing office and 34,463 were received from libraries. The remainder were turned over by the several executive departments and offices of the government.

There were 689,812 documents distributed and sold. Of the documents distributed 257,945 were sent to designated depository libraries. This is equal to 527 documents for each library. Thirty thousand seven hundred and forty-one publications of the geological survey were supplied to school, college and public libraries under the provisions of section 702 of the printing act approved January 12, 1885; 8,822 were supplied to "remainder" depositories and 12,250 to commercial libraries. The remainder were supplied to complete sets under the clearing-house system.

There are now in the public documents library 38,882 books, 1,000 pamphlets, and 5,554 maps. The increase during the year was 6,360 books and 907 maps.

DEATHS IN THE ARMY.
